### 5. Degradation Fee Formula

This formula covers degradation for depreciation caused by intrusion into the right-of-way. The deprecation applies to the original surface of the right-of-way and to the overlays and seal-coats applied to the surface. The formula includes life expectancy schedules for each and has an Estimated cost per square yard based on the quality of the right-of-way surface required for different levels of traffic. This formula creates a degradation fee which is determined by the cost per square yard for street, overlay, and seal-coat, multiplied by the depreciation schedule, multiplied by the area of the street patch.

Degradation Fee: (cost per square yard for street, overlay and seal-coat x depreciation schedule

**BE IT FURTHER RESOLVED**, that the fees established by Lexington City Code, Section 6.04, "Fixing License Fees", herein are in addition to and not in lieu of the deposits for administrative costs. The recommended deposits stated herein are the minimum amounts required

for the applications indicated to pay for planning, city engineer and legal consultants, etc., used by the City to complete its review.

**PASSED** and adopted by the Lexington City Council this the 5th day of January, 2023.
